

BPP's Enhanced Classroom (ECR)

Enhanced Classroom (ECR) is ideal for university students on ACCA or CIMA accredited studies. With ECR, students have constant access to online study materials and a range of assignments and tests. At any time and any place.

By working with us, students gain access to our Virtual Learning Environment called the BPP HUB. It is here that they have access to:

- recorded course lectures with all topics from the syllabus;
- online tests covering all the material required for the exam;
- the Assumed Knowledge section, where they will be able to make up any gaps from the past;
- a description of the necessary examination skills;
- demonstrations of exam techniques and discussion of exam questions;
- guidance on how to approach a resit of the exam;
- exam software so they can practice in the environment they will encounter on the exam;
- additional exam questions.

The BPP HUB can be accessed online on desktops and laptops as well as on the mobile app, so that content is also available offline.

In addition, the lecturer has access to reports with student results to monitor their progress in self-study.

The ECR works seamlessly with BPP books and Tutor Toolkits, so that both lecturers and students have access to the full set of high-quality BPP study materials.

Key benefits of Enhanced Classroom

Experience

With over 40 years' experience in the education industry, we have used all the knowledge and best practice from our classroom courses to design and develop the market-leading Enhanced Classroom product.

Flexibility

Pre-recorded lectures delivered by BPP experts can be paused, rewound and fast-forwarded, allowing students to learn at their own pace.

Topics and learning exercises

Our materials are divided into logical topics linked by exercises. Tasks within each topic will help students identify their strengths and weaknesses in specific areas and acquire basic knowledge from the syllabus.

At the same time, students have the opportunity to consolidate their knowledge with real-life examples. Each exercise helps students to understand and apply their knowledge in practice by explaining concepts, showing an example solution or providing opportunities to apply concepts in additional tasks.

Tests

Each student is given access to their individual account on the BPP HUB online platform, where there is an Achievement Ladder with a series of tests. Each test on the Achievement Ladder is more complex and the range of knowledge tested expands as the student progresses through the syllabus to a full syllabus.
